

ABSTRACT

An information record medium is provided with: a content space in which a plurality of content domains are recorded, each
5 content domain being constructed from a series of content information; and a system space in which a plurality of menu domains corresponding to the plurality of content domains are recorded, each menu domain being constructed from menu information as for the content information. Another menu domain
10 is recorded in the system space, in addition to the plurality of menu domains, the another menu domain being constructed from menu information as for whole of the plurality of content domains or as for whole of the information record medium.
